

Table 1. Aims for human dimensions research developed at September 2019 workshop

1	Summarize existing human dimensions data across states and regions with different CWD levels and management
2	Develop a coordinated human dimensions research agenda on CWD
3	Identify and engage all stakeholders on their interests in CWD
4	Develop consistent, comprehensive, science-based messaging about CWD
5	Adapt #3 to and evaluate effectiveness of targeted communication strategies for different audiences

Engage stakeholders in messaging

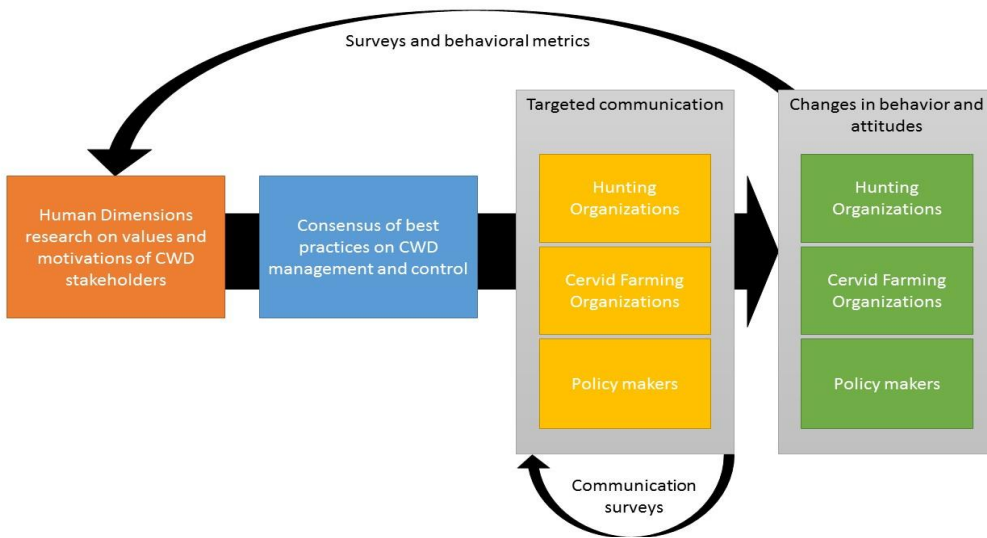

Figure 1. Conceptual diagram of the iterative approach to blending human dimensions research with science communication in the larger effort to control CWD across states.
